

# Custom Domain Guide

## Choose a subdomain of your main domain to host all Pods

We recommend using the subdomain "pod" to become the parent of all your pod webids, for example:

**pod.gibson-design.com**

Then a project pod webid would be, as an example, <https://project.pod.gibson-design.com/i>

## Purchase a wildcard SSL certificate for the subdomain

Be sure the certificate supports encryption for both the main subdomain <https://pod...> as well as unlimited subdomains ie: <https://project.pod...> (\*.pod...)

Once the certificate is received, forward the private key, domain certificate and certificate bundle to Graphmetrix: [support@graphmetrix.com](mailto:support@graphmetrix.com)

## Map DNS of subdomain to Graphmetrix

For US (trinpod.us) use: 5.161.22.83

For EU (trinpod.eu) use: 95.217.246.39

Type *	Name *	Value *	TTL
<input type="text" value="A"/>	<input type="text" value="pod"/>	<input type="text" value="5.161.22.83"/>	<input type="text" value="1/2 Hour"/>
<input type="text" value="A"/>	<input type="text" value="*.pod"/>	<input type="text" value="5.161.22.83"/>	<input type="text" value="1/2 Hour"/>

Please contact [support@graphmetrix.com](mailto:support@graphmetrix.com) if you have any questions.
